Objective

Looking to begin my career by applying experience from **MRacing**, **FIRST Robotics** and **personal projects**. Seeking to further develop my practical knowledge with **strong technical mentorship** at an **automation**, **controls**, or **systems** focused **internship** opportunity during **spring-summer 2023**.

Education

University of Michigan | Ann Arbor, MI

B.S. Robotics Engineering — Aug 2022 – April 2025

- ROB 101 | Computational Linear Algebra
- ROB 102 | AI and Programming Robots
- MATH 216 | Differential Equations
- PHYS 240 | Physics E&M

Harborfields High School | Huntington, NY

Advanced Regents Diploma — 2018-2022

- GPA: 4.0
- AP Scholar With Distinction
- SAT – 800 Math, 750 English

Projects and Activities

(See Portfolio)

(See YouTube)

Autonomous Formula Electric Racing (MRacing) — Sept 2022 - Present

- Developing a full stack **autonomous** (**SLAM** + **trajectory planning**) package for our 2023 **racecar**
- Trained a custom **YOLOv7** model for **cone detection**
- Implemented a monocular **perspective-n-point** algorithm to **visualize** any racetrack from a **top-down** perspective
- Programmed a track **boundary estimator** and track **mid-line regression** algorithm

FIRST Robotics (FTC) — 2018-2022

- Ranked **top 40 internationally** at Maryland Tech Invitational (2022)
- **CAD** lead, **Co-programmer**, Club **President** (2022)
- **Iteratively Designed** mechanisms in CAD to manipulate small plastic objects efficiently (**grippers**, **conveyors**, **linear slides**, **drivetrain**, etc.)
- Programmed a triple **dead-wheel odometry localizer** to perform tasks **fully autonomously** and **optimized** velocity **trajectories** to achieve **high scoring** rates

Stewart Platform — 2021

- Designed a **6-DOF parallel manipulator** as a research project
- Developed **kinematics** and **dynamics** control algorithm
- Implemented **IMU acceleration dampening** on end effector

Other — 2019-2021

- Designed and built a custom **dual-nozzle 3D printer** to print dissolvable support material
- Developed silicone tether-less pneumatic **artificial muscles** for a regional ISEF competition

Skills

Programming: Java | Python | C++ | MATLAB | Simulink | Julia | Mathematica | OpenCV | Pytorch
Software: Solidworks | Fusion 360 | Onshape | Simplify3D | Blender | Supervisely | Roboflow | MS Office
Spoken Languages: Mandarin (Native)

Leadership

Robotics Club President — 2021-2022
Senior Patrol Leader (Boy Scouts) — 2020-2021

Other Activities

Michigan Climbing Club — 2022-Present
Boy Scouts of America — 2016-2021
Varsity Golf, all-county — 2018-2020
